

Designing a system approach to sustainable development of the information society – by the example of Poland

2011/01/B/HS4/00974, 2011-2014

The head of the grant: Associate Professor Ewa Ziemba, Post Ph.D., D.Sc.

The primary goal of the project was to design a system approach to the sustainable information society development. As such, the goal of the project entails the realization of detailed cognitive, methodological and empirical goals. These goals were focused on the main stakeholders of the sustainable information society, i.e. people, enterprises, and government units as well as information-communication technologies as the main enablers of economic, socio-cultural, political and ecological sustainability.
