Recommendation  
for post graduate studies „Business English”

At first, I would like to indicate that these studies were proceeded in professional way. Dr Anna Wieczorek, Prof. Maciej Mitreęga and others teachers had perfect approach to teaching. All of them demonstrating adequate competence and expertise in their subjects. Furthermore, all of the classes were conducted in a friendly atmosphere what was important for me.

Secondly, not only I widened my horizons in terms of economics but also I met a lot of interesting people from different backgrounds. All of them work in business areas which allowed us to exchange our experiences. What is more, some of them became my new friends.

Thirdly, focusing on the topics itself they develop variety English skills as well as knowledge about economics, appropriate presenting, set up own business, selling our ideas and many others. As can be noticed, these studies were excellent addition to my education and experience.

I recommend them to everyone who desires extend their knowledge in the range of business and economics with pleasure.

Kind Regards
