International Summer School 2016

Academic Program

This module is designed for students interested in international economics and international management. It provides a unique combination of business and economics lectures focusing on opportunities, threats and challenges facing future managers and politicians throughout the world.

The economics lectures will cover European macro, climate, trade and competition policy as well as the eastern enlargement of the Union. The business lectures will deal with international financial reporting and taxation, global supply chains and human resource management in the wake of the demographic transition.

Social Program

The lectures are combined with excursions to the international oriented companies and public insititutions which allow for discussions from a more practical perspective.

Cultural activities such as wine tasting and a guided tour of the Würzburg Residenz complement the learning experience in order to provide students with a deep insight into the regional life style.
